

Off Service Procedure

When operating off service drivers must be aware of the following procedure:

You **MUST** always use roads that follow regular bus routes.

ALWAYS be aware of low bridges on and near the route you are following.

If you are unsure of what route to take you **MUST STOP** and call Control for advice and instructions.

If you are asked to run off service for reason such as being turned short, changed over etc, you **MUST** check with Control as to what route they need you to take to start your next journey.

Your assistance in this matter is appreciated.
