

# Engines & Lights

## Engines

Drivers are reminded that engines must be switched off at all times during any layover time at a terminus, or at any bus stop where the vehicle will be stationary for a longer time than is necessary. This will avoid disturbance to residents and reduces pollution.

This is not only company procedure but also a fixed penalty (fine and licence endorsement) offence.

## Lights

Please also be reminded that when waiting with engines switched off they must switch off their exterior lights and saloon lights to reduce the load on the vehicle batteries.

The co-operation of staff in this matter is appreciated.
