Workplace Parking

Employees are reminded that parking areas in our garages are not public places, this includes family and friends.

We are responsible for all persons entering our premises. With more than 800 vehicle movements a day in each of our Lothian garages, the integrity of our traffic management system cannot be compromised by persons unsure of or unfamiliar with the risks associated with workplace transport in a busy garage environment.

Family or friends of employees have been observed returning to parked vehicles with children, pushchairs or bags of shopping etc. This type of activity is not permitted.

Only employees are permitted to drop off/pick up vehicles from Company premises (unless prior managerial authorisation is sought and granted. A site induction may also be required.)

We are also reminding employees that vehicles may only be parked on site when you are at work or engaged in work related activities.

Your cooperation in this matter is appreciated.
