

Trip numbers

At the start of a new journey and when taking over a bus, please remember to key in the ticket machine:

The correct **service number**, including any variants shown on the running board (3Z, 26W, 31Z, N25 etc...).

Letters and special characters can be found by pressing the + key on the ticket machine.

The correct **block number**.

The correct **trip number**.

The correct **stage number**, as shown at the back of the running board.

Having the correct data recorded on the ticket machine is now even more essential as our Commercial team continues to analyse customer numbers to identify any adjustments to the network.

Your assistance in this matter is appreciated.
