

## Nearside Collisions

**We need your support to reduce the volume of nearside incidents.**

Anticipating risk through good all round awareness is key. Allowing yourself the required space to safely make your manoeuvre whilst utilising your mirrors, is vital to reduce the risk of nearside collisions.

### **Some common risks:**

- **Undertaking vehicles**
  - **Cyclists**
- **Tailswing when manoeuvring in and out of bus stops**
  - **Pedestrians walking close to the kerb**
    - **Overhanging trees**
    - **Bus stop poles**

Whilst we continue to work with the council regarding on street furniture, road markings and bus stops, there will always be other risks present. Please continue to exercise caution with nearside manoeuvres.

Your assistance is appreciated.
