

## New AVL Pilot Buses

An initial batch of 3 buses have been installed with the new Navineo AVL equipment - **94, 250** and **698**. The equipment is currently powered down, therefore the process for contacting Control via radio will be different on buses **94** and **250**.

This process will be the same as the current process for all vehicles in the 601-698 batch, and electric buses 291-294. To **contact Control by radio**, please **use the 'F1' button** on the radio as shown below:

When leaving the garage with any bus without AVL equipment, please contact Control using the radio to ensure the bus can be logged on and tracked.

**Emergency Radio calls can still be made using the emergency button.**

Your assistance with this matter is greatly appreciated.
